

ALFALFA DOUBLE COMPRESSED BALES

Suncured alfalfa in double compressed small bales.

Product information

Suncured alfalfa in double compressed small bales is the ideal highly digestible fibre-based protein fodder for a balanced diet of livestock animals thanks to:

1. its high content of cellulose,
2. its exceptional protein content with high levels of lysine (essential amino acid),
3. its low levels of starch and sugar (lower than 12%),
4. its high content of calcium, potassium and iron

its exceptional Relative Feed Value (RFV).
