

ORGANIC SORGHUM

100% ORGANIC SORGHUM FARMED IN ITALY

Sorghum is considered one of the most versatile cereals, and is widely used in human and animal nutrition, and for the production of biogas.

Long appreciated by the feed industry for its nutritional content, rich in starches, proteins and essential amino acids, sorghum is widely used for the rationing of poultry and pigs in growth and production phases. In the feed rationing of dairy cows, sorghum is a highly valid alternative to maize, and, thanks to its natural agronomic characteristics, such as reduced water requirements and resilience to parasites, the advantages for farmers are not only in terms of economics, but also of environmental sustainability.

ORIGIN

Italy (Emilia Romagna, Lazio)

NUTRITIONAL FACTS*

Bulk density	79,10	kg/hl
Ash	1,89	%
Protein	11,90	%
Fat	2,90	%
Fibre	3,11	%
Moisture	14,13	%

* Average analytical data (% on dry matter basis)

PACKAGING

Available:

- in bulk
- in 1000/1500 kg jumbo bags, with or without pallet

Sustainable Cereals

Gruppo Carli cereals are cultivated without irrigation.
