

## STRAW WAFER

100% STRAW FROM ITALIAN CEREALS

Carli straw comes from cereals grown on Italian fields and processed by Group premises in Italy. Hard and soft wheat, spelt and barley are cultivated with no use of chemical fertilizers, pesticide treatments and irrigation.

Straw wafer by Gruppo Carli is completely natural and mechanically processed only: the cutting, the chopping and the compression into wafers involves no additives or other substances.

It is successfully employed in livestock breeding, as fiber complement in the daily ration or as natural bedding for animal welfare.

### ORIGIN

Italia (Emilia Romagna)

### COMPOSITION

100% cereal straw (wheat, barley and spelt) GMO FREE

### SHAPE AND PACKAGING

Cubes cm 3x3

Available in:

- bulk
- 18/20 kg bags on pallet of 70 bags

#### Sustainable straw

*Gruppo Carli employs own renewable energy in processing straw.*

FIBER	40% - 50%	40% - 50%	40% - 50%
ASH	7% - 11%	5% - 8%	5% - 8%

## BENEFITS

Straw wafer by Gruppo Carli is a healthy, safe and quality guaranteed product, made of 100% Italian cereal straw.

Thanks to the high temperature pelletizing process it is hygienic and free of mold and undesirable bodies.

The wafer consistency (short fiber) facilitates the dosage and reduces the grinding times in the TMR preparation.

The packaging in paper bags protects against external contamination, ensures long-lasting storage and allows usage all year long and in different farming conditions.

## SUGGESTED FOR

## USE

Straw wafer is successfully employed as fiber complement in animal nutrition, in different breeding conditions (dairy or meat cattle, sheep and goats, horses, poultry, pigs) and in all seasons.

Integrate the daily ration as per veterinarian's suggestion.
