# Cricca

PELLETS

Organic fodder grown and processed entirely in Italy

## Choose CRICCA because:

- It is natural: it is composed only of fodder, without the use of cereals that can be harmful to the animal
- It is healthy: it comes from dehydrated and dust-free fodder and therefore does not release dust that could be harmful to the respiratory system of animals and humans
- Due to the presence of fibre, it prevents gastrointestinal disorders and prevents excessive tooth growth
- It releases a natural scent of botanical essences
- It has no expiry date if stored in a cool, dry place
- It is sustainable: the packaging is 100% biodegradable!

### Composition

First cut of organic polyphytic hay.

### Instructions for use

Supply at will, taking care to leave plenty of fresh water available for the animals, supplementing with a small amount of appropriate fresh vegetables, specific feed and snacks. Consult your veterinarian for more specific instructions regarding your animal's species.

## Cricca House

Cricca House is a set that includes:

- 1 cardboard house for your four-legged buddy
- 6 x 2.5 kg bags of hay pellets
