PACKAGING:

BALES

Tied with iron wires or ropes
Weight: approx. 800 - 900 kg
Fibre length:
5 - 10 cm
> 10 cm

HALF BALES

Tied with plastic stripes
Weight: approx. 400 - 420 kg
Fibre length:
5 - 10 cm
> 10 cm

DOUBLE COMPRESSED BALES

Tied with nylon twines
Weight: approx. 25, 40 or 80 kg
Fibre length: > 10 cm
Wrapped in blocks of 48 bales, with or without pallet

SMALL BALES

Packed in recyclable plastic
Weight: approx. 22 - 23 kg
Fibre length: 3 - 10 cm
Pre-cut in four portions.
Blocks of 48 bales on pallet

PELLET

Diameter: 4, 6, 8, 10 mm
Available in:
25 kg bags on pallet of 60 bags
500/1500 kg jumbo bags
Bulk

CRUSHED PELLET

Available in:
20 kg bags on pallet of 60 bags
500/1500 kg jumbo bags
Bulk

WAFER CUBES

Size: 3x3 cm
Available in:
18 kg bags on pallet of 70 bags
500/1500 kg jumbo bags
Bulk

BLEND

HAY BLENDS represent the natural evolution of hay fields, grown without herbicides. Various botanical essences such as *Leguminosae* and *Gramineae* are naturally present in the blends, in variable ratios. Their composition makes those forages extremely versatile in animal feeding.

STRAWS

STRAWS, obtained from seed cultures such as alfalfa and ryegrass, or from cereals including wheat, barley and spelt, answer to multiple farming necessities. Straw can be used as fiber integration in ratios, or, thanks to its high absorption capacity, as an excellent bedding.

ORGANIC FORAGE

Gruppo Carli grows its forages without artificial irrigation, avoiding fertilizers and products of chemical origin in every phase of the production process. Alfalfa, hay and straw are not genetically modified and are processed mechanically, without additives or preservatives. The willingness to adopt sustainable cultivation methods and the accurate processing of raw matter allow Gruppo Carli to have organic certification on the whole product range, based on Italian and international standards.

Organic Certified Forage

Quality Management

ORGANIC CEREALS

Gruppo Carli grows organic cereals as result of crop rotation on its fields, located in northern-central Italy. Rotating cereals grown during the winter season between summer crops, such as alfalfa, increases significantly the grounds fertility, consequently production is increased in a completely natural way. Cereals, exactly as forages, are cultivated respecting Italian and international standards according to the organic certification. Organic cereals are available for both human and animal nutrition.
