

PACKAGING

Technical Sheet

Product Description

Carli Alfafuel is a high—quality forage made of 100% pure italian alfalfa (Medicago sativa) selected. sun—cured or dehydrated. During the production process the hay is cleared of mould. spores and dust and the packaging in PP saves it from environmental contamination

General Nutritional Properties

Carli AlfaFuel is the ideal highly digestible

fibre—based protein supplement for a balanced diet of horses and other equids thanks to:

(100% ITALIAN HAY, PROCESSED IN ITALY 🕕

- its high content of cellulose
- exceptional protein content with high level of lysine
- its low levels of starch and sugar
- its high content of Calcium. Potassium and Iron

Feeding Guidelines

Up to 1.5/3.5 kg per day for a horse of 500 kg bodyweight.

Nutritional Specifications

CARLI Alfafuel is specifically studied for horses in different stages that require additional protein intake, such as in reproduction. lactation, growth development and during several pathological conditions. Given its high Calcium content it is advised to add a source of Phosphorus to the diet. Thanks to its long—lasting buffering action. CARLI Alfafuel is a valuable aid to horses affected by gastric ulcer syndrome (EGUS). Thanks to its low content of NSC (non—structural carbohydrates)
CARLI Alfafuel is the first—choice feed for horses and ponies that are prone to carbohydrates—associated disorders (laminitis, colic, equine metabolic syndrome, equine Cushing/PPID, chronic diarrhea, and gastric

ulcers) or those already affected by such conditions.

Italian origin = quality and sustainability guaranteed

All ingredients used in the production of Gruppo Carli forages are sourced from Italian fields in the Emilia—Romagna region and processed in the company's own factories in Italy. Buying Gruppo Carli products for your horse means opting for forages made from equine—specific grasses.All Gruppo Carli horse line products are packaged in order to

ensure both effective handling and the best long—lasting preservation of its nutritional forage features (including vitamins and minerals) together with protection against sunlight, air and mould.
