

STRAW DC BALES

100% STRAW FROM ITALIAN CEREALS

Carli straw comes from cereals grown on Italian fields and processed by Group premises in Italy. Hard and soft wheat, spelt and barley are cultivated with no use of chemical fertilizers, pesticide treatments and irrigation.

Straw bales by Gruppo Carli is completely natural and mechanically processed only: the cutting, the chopping and the compression into bales involves no additives or other substances.

It is successfully employed as fiber complement in animal rations or as natural bedding, in different breeding conditions (dairy or meat cattle, sheep and goats, horses, poultry, pigs) and in all seasons.

USE

Distribute on the floor the desired quantity of straw.

Remove the dirty parts daily and replace the litter with clean straw. Every 20-30 days remove completely the bedding, clean the floor and distribute clean straw.

Natural and highly absorbent, straw bales by Gruppo Carli is a wholly disposable natural bedding with no negative impact on the environment: it rapidly composts into nitrogen-rich manure.
