

ORGANIC BARLEY

100% ORGANIC BARLEY FARMED IN ITALY

For its excellent nutritional qualities, including high digestibility and a high energy, protein and amino acid content, and agronomic qualities, including growth speed and adaptability to more extreme environmental conditions, barley is considered a valuable primary cereal.

Gruppo Carli's organic barley is crop-rotated with alfalfa, which is known to cleanse and fertilize the land, and harvested and stored under the direct management of the group's companies.

Gruppo Carli's organic barley is widely used in the feed industry, due to its numerous beneficial effects for animal health, and particularly in nutritional formulations for cattle and pigs, thanks to its high lysine and niacin content and well-known tonifying and fortifying properties.

ORIGIN

Italy (Emilia Romagna, Lazio)

NUTRITIONAL FACTS*

Bulk density	79,10	kg/hl
Ash	1,89	%
Protein	11,90	%
