

BIOCOMPLET LACTATION PI-ERRE

ORGANIC FEEDING SYSTEM FOR LACTATING GOATS AND SHEEP

A **complete feed** for **small ruminants** specifically designed for the **lactation phase**.

It consists of carefully selected high-quality forages and concentrates to balance the ration, resulting in a physical structure that effectively stimulates **ruminal activity**. The product is carefully blended, making it difficult for the animals to select.

Biocomplet Lactation Pi-Erre constitutes a nucleus to which **pasture and forages** can be combined, as well as specific dietary supplementation during milking, in compliance with the organic feeding regime.

It can be used as a **complete feed**, to be left available to the animals throughout their housing time in shelters or confined areas.

PACKAGING

- in bulk;
- 400/500 kg bales tied with iron wire;
- bales of approximately 25 kg wrapped in recyclable plastic, pre-cut into 4 portions and packaged in blocks of 48 bales on pallets.

Bale dimensions:
cm 30 X 60 H 30

Pallet dimensions:
cm 120 X 90 H 245

TIPS FOR CORRECT USE

Biocomplet Lactation Pi-Erre can meet the needs of medium production animals when fed ad libitum. It is therefore suitable for use as a **complete feed** (Unifeed), which is particularly useful when operating under permanent housing conditions.

Voluntary daily consumption will vary in this case depending on the species and breed reared:

- **Small sheep (Sarda)** if fed only with this product may voluntarily consume a ration of **1.7-2.2 kg**;
- **Large sheep (Asaf, Lacaune)** and highly productive goats may consume as much as **2.6-3.3 kg**.

The product is supplied in 25 kg packages; once the packaging is removed, each bale is divided into four compact portions. Feed the quarters thus obtained without altering their structure; this will limit the natural tendency of the animals to select the components, favouring a regular and uniform intake. Depending on the species and characteristics of the animals reared, it is possible, if necessary, to provide a **food supplement during milking**. In this case, it is advisable to work under the guidance of a trusted technician, to whom Gruppo Carli will be happy to provide details for the best use of the product.

SELF-PRODUCED Complete feed

- + purchase of raw materials
- + working time

- + storages
- + machinery

- + structural costs
- + financial commitment

- + risks
- + specialised labour

**RATION
(UNIFEED)**

VS

TOTALFEED CARLI Ready to use Unifeed

- single feed
- + diversified phases

- + barn space
