

# TOTAL FEED LACTATING GOATS

## FEEDING SYSTEM FOR LACTATING GOATS

A **complete feed** for goats specifically designed for the **lactation phase**, with careful attention to nutrition and structure.

It consists of **high-quality forages** and carefully **selected concentrates**, whose physical structure stimulates **ruminal activity** correctly and effectively. The feed is expertly mixed, making it difficult for the animals to select.

Designed for use as a **complete feed**, it should be left freely available to the animals throughout their stay in the barn or confined area.

It is the main food base, to be combined with the specific food **supplement** during milking.

## PACKAGING

- in bulk;
- 400/500 kg bales tied with iron wire;
- bales of approximately 25 kg wrapped in recyclable plastic, pre-cut into 4 portions and packaged in blocks of 48 bales on pallets.

Bale dimensions:  
cm 30 X 60 H 30

Pallet dimensions:  
cm 120 X 90 H 245

## TIPS FOR CORRECT USE

Feed during the **lactation phase** in two or three doses over 24 hours, rationing so that at the end of the day there is a surplus of less than 3-5% of the total made available.

**Totalfeed Lactation Goats** is suitable for use as a **Unifeed**, being able to sustain an average daily production of approximately 4 litres, if taken in quantities of 3.5kg.

Depending on the animal's characteristics or in the event of exceptional production performance, it will be possible to provide a **food supplement during milking** to help cover any greater needs; in this case, it is advisable to work under the guidance of a trusted technician to whom Gruppo Carli will be happy to provide, if requested, any details useful for the best use of the product.

It is advisable to feed the portions of bale obtained after removing the packaging without altering the structure: this will limit the animals' natural tendency to select the components, thus keeping the intake of the ration uniform over 24 hours.

### SELF-PRODUCED Complete feed

- + purchase of raw materials
- + working time

- + storages
- + machinery

- + structural costs
- + financial commitment

- + risks
- + specialised labour

**RATION  
(UNIFEED)**

## VS

### TOTALFEED CARLI Ready to use Unifeed

- single feed
- + diversified phases

- + barn space
- + free time

- + management simplicity
- + hygiene in storage

- + well-being and productivity
- specialised labour
