

# TOTALFEED MILK 30 COWS

## FEEDING SYSTEM FOR LACTATING COWS

This is a **complete feed** for **dairy cows** specifically designed for the **lactation phase**.

The energy and, in general, nutritional needs during this phase require the use of high quality **forages with a high nutritional value** and **maximum digestibility and bioavailability**.

Particular care has been taken in defining the structure of the product: the forage fraction is subjected to controlled chopping while, as far as concentrates are concerned, an attempt is made to maximise the proportion of structured raw materials, with the intention of providing a further contribution to **stimulating ruminal activity** without losing sight of the need to make **the ration difficult for the animals to select**.

## PACKAGING

- in bulk;
- 400/500 kg bales tied with iron wire;
- bales of approximately 25 kg wrapped in recyclable plastic, pre-cut into 4 portions and packaged in blocks of 48 bales on pallets.

Bale dimensions:  
cm 30 X 60 H 30

Pallet dimensions:  
cm 120 X 90 H 245

## TIPS FOR CORRECT USE

**Totalfeed Milk 30 Cows** is a **complete feed**, as it is capable of satisfying the entire requirements of lactating animals of medium production level (within 30 L/day as a herd average).

The ration can be supplemented according to need by administering varying amounts of concentrates throughout the day. Depending on size, genetics and production level, the feed can be consumed at a rate of **22-27 kg/head per day**.

It is advisable to work under the guidance of a trustworthy technician during these phases.

### SELF-PRODUCED Complete feed

- + purchase of raw materials
- + working time

- + storages
- + machinery

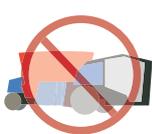

- + structural costs
- + financial commitment

- + risks
- + specialised labour

**RATION  
(UNIFEED)**

VS

### TOTALFEED CARLI Ready to use Unifeed

- single feed
- + diversified phases

- + barn space
- + free time

- + management simplicity
- + hygiene in storage

- + well-being and productivity
- specialised labour
